

ICTS Group – Truck & Trailer Technician (Electrician)

Job description:

Are you passionate about trucks and technology? ICTS is expanding and looking for skilled mechanics to help shape the future of the Truck & Car Carriers operations in Gent. Work in a dynamic, international environment alongside a team of experienced professionals.

Your tasks:

- Perform diagnostics, troubleshooting, and repair on multi-brand trucks and trailers.
- Repair and maintain electrical and electronic systems, incl. lighting, wiring, sensors, control units, ABS/EBS, CAN-bus systems, and other safety systems.
- Conduct pre-MOT checks and assist with MOT preparation.
- Identify required spare parts and communicate needs clearly to the parts department.
- Complete job cards accurately, detailing diagnostics performed, parts used, and labour time.
- Ensure all work is performed safely and according to manufacturer and company standards.
- Maintain cleanliness, order, and safety within the workshop.

Your profile:

- Proven experience as a Truck & Trailer Technician or Technician with a strong electrical focus.
- Solid understanding of vehicle electrical and electronic systems.
- Proficient with diagnostic software, multimeters, and electrical testing equipment.
- Ability to read wiring diagrams and technical documentation.
- Strong attention to detail, quality, and safety.
- Team-oriented with effective communication skills.
- Language skills: a good understanding of English and/or Dutch (additional languages are an advantage).

What we offer:

- Stable full-time position in a modern, fully equipped workshop.
- Clear onboarding process with technical training.
- Work alongside a professional and supportive international team.
- Opportunities for skill development and internal career growth.
- Assistance with relocation or accommodation if needed.
